

# HPB High Precision Series

# HPB Series | Precision Balance

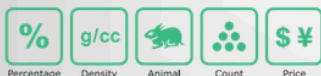

EXTERNAL CAL ( With CAL Weights ) Loadcell Sensor HPB series are excellent product which are made by higher level technology of 0.001g-0.1g accuracy. It has firmly iron shell, transparent and beautiful glass windproof which is not used is same level product. It has quick response, high sensitivity and stability

## Characteristic

## Application Mode

## HPB High Precision Balance Series

### Characteristic:

- Loadcell Sensor
- Mostly Auto dual range/dual precision
- External Calibration
- Real-time temperature compensation
- Seven level anti-vibration adjustable
- Anti-static mental shell
- VATN Backlit LCD Display
- Weighing stableness time adjustable
- More than 20 unit shield: g, kg, ct...
- Default weighing mode automatically
- Date, time and temperature setting
- With carrying handle
- RS232 to communicate with PC and printer
- Measurements are directly readable on PC
- Optional with underhook
- Optional with rechargeable battery

### Application Mode

- Percentage Weighing
- With density determination
- With dynamic weighing function
- Selectable weighing and count mode
- Pricing function
- High-low weighing function
- Gross/Net/Tare weight weighing
- Peak holding function
- Accumulate function

| SPECIFICATION   |             |             |             |
|-----------------|-------------|-------------|-------------|
| Model           | HPB 3200    | HPB 2200    | HPB 1200    |
| Capacity (g)    | 3200g/4200g | 2200g/3200g | 1200g/2200g |
| Readability (g) | 0.01g/0.05g | 0.01g/0.05g | 0.01g/0.05g |
| Pan Size (mm)   | 156*156     | 156*156     | φ131        |
| Housing (mm)    | 280*208*95  | 280*208*95  | 280*208*305 |
